Shahd Abd Elghany

Front-End Developer (React.js)

shahdabdalgny123@gmail.com | https://www.linkedin.com/in/shahd-elghny-gad/
Qena, deshna, Egypt | +201142587545

I'm a Computer Science student who's passionate about front-end development, especially using React. I've worked on responsive websites and I really enjoy focusing on user experience and creating clean, easy-to-use interfaces. I have a good background in UI/UX basics, and I'm always excited to learn new technologies. I'm also good at problem-solving, working in a team, and turning ideas into real projects. My goal is to keep improving and build useful, real-world applications.

Education

South Valley University   Oct 2023 - Present

    Bachelor's Degree Computers and Information

Projects

Prayer Tracker   Jul 2025 - Jul 2025

    simple web app that helps users track their daily prayers .

- Select a date range (from – to)
- Automatically generate a table with all five daily prayers for each day
- All data is saved locally using localStorage.

Makeup Artist Landing Page   Apr 2025 - Apr 2025

    Designed and developed a responsive landing page for a professional makeup artist using HTML, CSS, and JavaScript. The page showcases services, portfolio images, and contact information in a visually appealing layout suitable for beauty brands

- Focused on elegant and clean UI to match the brand style
- Used responsive design techniques to ensure mobile-friendliness
- Implemented smooth scrolling and clear call-to-action sections
- Optimized layout and content for better user engagement

Restaurant Website   May 2025 - Jun 2025

    A responsive restaurant website that allows users to browse a categorized food menu. The site also includes a reservation feature where users can book a table and select a preferred date and time. contact section is provided to facilitate communication with the restaurant.

- Fully responsive design using Bootstrap
- Contact us section for customer support
- Table reservation form with date and time selection

Work Experience

Front-End Developer (Academic Project)

May 2025 - Jun 2025

Faculty of Computers and Information, South Valley University | Qena, Egypt

Built a responsive restaurant website using HTML, CSS, JavaScript, and Bootstrap. Integrated a free API to dynamically display product data such as food items . Focused on creating a clean, user-friendly layout with mobile-first design.

- Fetched and displayed data from a free API for menu items
- Designed reusable UI components with interactive behaviors

Front-End Mentor

Jan 2025 - Mar 2025

GDG on campus - South Valley University | Remote/Egypt

Supported participants in learning front-end technologies including HTML, CSS, and JavaScript during a GDG Bootcamp. Provided guidance, code reviews, and answered questions to help learners build real web projects.
